

## REMARKS

This is a Supplementary Amendment.

By the present amendment, a new claim 11 is added. It is respectfully submitted that claim 11 is patentable over prior art, including Rebentisch. Specifically, claim 11 recites a transformation device arranged between the stop (6) and the fastening means for converting a translational movement of the fastening means (7; 35) relative to the stop (6) in a rotational movement of the rear engagement member (4) relative to the stop (6; 37), whereby the rear engagement member (4) is displaced from the first position thereof to the second position thereof in which it engages the holding projections (17.1, 17.2).

No such transformation device is disclosed in Rebentisch.

Allowance of the application is respectfully requested.

Respectfully submitted,

Alexander Zinchuk
